Notes:
/1 Adjustment made to annualize depreciation expense
/2 Asset balances in these accounts are fully depreciated. Therefore, EPNG is not requesting any depreciation expense for these asse
/3 Depreciation expense calculation based on the net positive depreciable plant balance of $12,012,22
/4 Amortization of SFAS 109 Regulatory Asset is based on 30-year estimated remaining life of EPNG facilitie
/5 Regulatory Asset East Valley Lateral Sale is a result of the sale of the undivided interest at a loss of $4,127,507. Amortization based on transmission annual depreciation rate of 2.20
/6 Amortization of Samalayuca Regulatory Liability is based on EPNG's transmission annual depreciation rate of 2.20%
/7 Amortization of Havasu Regulatory Liability is based on EPNG's transmission annual depreciation rate of 2.20%

1. General

Organization

We are a Delaware limited liability company, originally formed in 1928 as a corporation. When we refer to "us," "we," "our," "the Company," or "EPNG" we are describing El Paso Natural Gas Company, L.L.C. We are an indirect wholly owned subsidiary of Kinder Morgan, Inc. (KMI).

Basis of Presentation

We have prepared our accompanying financial statements in accordance with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases, which is a comprehensive basis of accounting other than accounting principles generally accepted in the United States of America (U.S.). In management's opinion, these financial statements reflect normal and recurring adjustments that are necessary for a fair presentation of our financial results for the periods presented, and adequate disclosures have been made to make the information presented not misleading. These financial statements should be read along with the financial statements and related notes included in our 2020 Annual Report of Major Natural Gas Companies on Form No. 2 (2020 Form No. 2).

2. Debt

The following table summarizes the net carrying value of our outstanding debt (in millions):

	September 30, 2021	September 30, 2020
8.625% Debentures due January 2022 (1)	$ 260	$ 260
7.50% Debentures due November 2026	200	200
8.375% Notes due June 2032	300	300
	760	760
Less: Current maturities	260	-
Total long-term debt, less current maturities	$ 500	$ 760

(1) As of September 30, 2021, we included $260 million of our 8.625% Debentures due January 2022 within the caption "Current Portion of Long-Term Debt" on our Balance Sheets. We intend to satisfy this debt through issuance of long-term debt, issuance of a promissory note from KMI, equity contribution from our parent or a combination of these options.

KMI and substantially all of its wholly owned domestic subsidiaries, including us, are a party to a cross guarantee agreement whereby each party to the agreement unconditionally guarantees, jointly and severally, the payment of specified indebtedness of each other party to the agreement.

Debt Covenants

As of September 30, 2021 and 2020, we were in compliance with our debt-related covenants. For a further discussion of our debt, see our 2020 Form No. 2.

3. Related Party Transactions

Cash Management Program

We participate in KMI's cash management program, which matches the short-term cash surpluses and needs of participating affiliates, thus minimizing total borrowings from outside sources. KMI uses the cash management program to settle intercompany transactions between participating affiliates. As of September 30, 2021 and 2020, we had no balance with KMI under the cash management program. The interest rate on this note is variable and was 0.2% as of both September 30, 2021 and 2020.

Proprietary Capital

The following table reflects changes to our proprietary capital accounts resulting from distributions paid to our Member, as well as other changes in certain proprietary capital accounts (in millions):

	Year ended September 30, 2021	
	Account 211	Account 216
Balance - Beginning of Period	$ 1,508	$ 23
Net Income, less equity in earnings of Mojave Pipeline Company L.L.C. (Mojave)	-	270
Transfer of net earnings from Account 216[1]	279	(279)
Transfer from Account 236[1]	67	-
Transfer from Account 186[1]	23	-
Total Transfers	369	(279)
Distributions of pre-tax earnings	(369)	-
Distributions as a return of capital	(38)	-
Total Distributions to Member	(407)	-
Cash distributions of earnings from Mojave	-	6
Capital contributions from Member	20	-
Balance - End of Period	$ 1,490	$ 20

(1) Settlements of these amounts are made within equity and are considered non-cash financing activities.

Other Affiliate Balances and Activities

The following table summarizes our other balance sheet affiliate balances (in millions):

Account		September 30, 2021	September 30, 2020
146	Accounts receivable from associated companies	$ 2	$ 2
174	Gas imbalances receivable from associated companies	3	1
186	Advance of deferred income taxes to Member	117	94
234	Accounts payable to associated companies	4	4
242	Gas imbalances payable to associated companies	4	1

The following table shows revenues and costs from our affiliates (in millions):

	Year ended September 30, 2021
Revenues	$ 5
Operation, maintenance and payroll tax expenses [1]	118
Capitalized costs	12

(1) We receive transportation services from Mojave and TransColorado Gas Transmission Company LLC. Included in these totals are expenses for these services of $46 million for the year ended September 30, 2021.

4. Litigation and Environmental

Legal Matters

We are party to various legal, regulatory and other matters arising from the day-to-day operations of our businesses that may result in claims against the Company. Although no assurance can be given, we believe, based on our experiences to date and taking into account established reserves, that the ultimate resolution of such items will not have a material adverse impact on our business. We believe we have meritorious defenses to the matters to which we are a party and intend to vigorously defend the Company. When we determine a loss is probable of occurring and is reasonably estimable, we accrue an undiscounted liability for such contingencies based on our best estimate using information available at that time. If the estimated loss is a range of potential outcomes and there is no better estimate within the range, we accrue the amount at the low end of the range. We disclose contingencies where an adverse outcome may be material, or in the judgment of management, we conclude the matter should otherwise be disclosed.

2018 Midland Pipeline Rupture. On August 1, 2018, a third party gathering line in Midland County, Texas ruptured and caught fire, which in turn caused the rupture and explosion of our natural gas pipeline located in close proximity to the third party gathering line. Several persons were injured, one of whom died from his injuries. Certain other persons sustained severe or extensive burns. Two personal injury lawsuits asserted by or on behalf of persons injured in the incident were filed and are pending against certain third parties and us. The cases are pending in Harris County, Texas and are presently scheduled to be tried beginning on January 18, 2022 and March 21, 2022. As they relate to us, the lawsuits allege that we failed to sufficiently maintain or mark our pipeline, and that we failed to implement or follow proper emergency response procedures. Plaintiffs seek compensatory and exemplary damages in unspecified amounts. We have notified our insurers and intend to vigorously defend the cases, particularly in light of the fact that the incident arose from the rupture of a third party gathering line.

Arizona Line 2000 Rupture. On August 15, 2021, the 30" EPNG Line 2000 natural gas transmission pipeline ruptured in a rural area in Coolidge, Arizona. The failure resulted in a fire which destroyed a home, resulting in two fatalities and one injury. The National Transportation Safety Board is investigating the incident. We have notified our insurers and intend to respond to any claims as they arise. The line is currently under a pressure restriction and, due to this force majeure incident, we are issuing reservation charge credits in accordance with our FERC gas tariff.

As of September 30, 2021 and 2020, we had $7 million and $8 million, respectively, accrued for our outstanding legal proceedings.

Environmental Matters

We are subject to environmental cleanup and enforcement actions from time to time. In particular, the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) generally imposes joint and several liability for cleanup and enforcement costs on current and predecessor owners and operators of a site, among others, without regard to fault or the legality of the original conduct, subject to the right of a liable party to establish a “reasonable basis” for apportionment of costs. Our operations are also subject to federal, state and local laws and regulations relating to protection of the environment. Although we believe our operations are in substantial compliance with applicable environmental laws and regulations, risks of additional costs and liabilities are inherent in our operations, and there can be no assurance that we will not incur significant costs and liabilities. Moreover, it is possible that other developments could result in substantial costs and liabilities to us, such as increasingly stringent environmental laws, regulations and enforcement policies under the terms of authority of those laws, and claims for damages to property or persons resulting from our operations.

Uranium Mines in Vicinity of Cameron, Arizona. In the 1950s and 1960s, Rare Metals Inc., a historical subsidiary, mined approximately 20 uranium mines in the vicinity of Cameron, Arizona, many of which are located on the Navajo Indian Reservation. The mining activities were in response to numerous incentives provided to industry by the U.S. to locate and produce domestic sources of uranium to support the Cold War-era nuclear weapons program. In May 2012, we received a general notice letter from the Environmental Protection Agency (EPA) notifying us of its investigation of certain sites and its determination that the EPA considers us to be a Potentially Responsible Party (PRP) within the meaning of CERCLA. In August 2013, we and the EPA entered into an Administrative Order on Consent and Scope of Work pursuant to which we are conducting environmental assessments of the mines and the immediate vicinity. On September 3, 2014, we filed a complaint in the U.S. District Court for the District of Arizona seeking cost recovery and contribution from the applicable federal government agencies toward the cost of environmental activities associated with the mines.

The U.S. District Court issued an order on April 16, 2019 that allocated 35% of past and future response costs to the U.S. The decision does not provide or establish the scope of a remedial plan with respect to the sites, nor does it establish the total cost for addressing the sites, all of which remain to be determined in subsequent proceedings and adversarial actions, if necessary, with the EPA. Until such issues are determined, we are unable to reasonably estimate the extent of our potential liability. Because costs associated with any remedial plan approved by the EPA are expected to be spread over at least several years, we do not anticipate that our share of the costs of the remediation will have a material adverse impact to our business.

Superfund Matters. Included in our recorded environmental liabilities are projects where we have received notice that we have been designated or could be designated as a PRP under CERCLA, commonly known as Superfund, or state equivalents for three active sites. Liability under the federal CERCLA statute may be joint and several, meaning that we could be required to pay in excess of our pro rata share of remediation costs. We consider the financial strength of other PRPs in estimating our liabilities.

Although it is not possible to predict the ultimate outcomes, we believe that the resolution of the environmental matters set forth in this note, and other matters to which we are a party, will not have a material adverse effect on our business. As of both September 30, 2021 and 2020, we had approximately $11 accrued for our environmental matters.

5. Supplemental Cash Flow Information

The following table contains supplemental cash flow information (in millions):

	Year Ended September 30, 2021
Interest paid, net of capitalized interest.	$ 63
