Re: Annual Recomputation of Fuel and Lost
and Unaccounted-for Retention Percentages,
Including the Operational Purchases and Sales Report;
El Paso Natural Gas Company, L.L.C.;
Docket No. RP25-

Commissioners:

El Paso Natural Gas Company, L.L.C. ("EPNG") tenders for filing and acceptance by the Federal Energy Regulatory Commission ("Commission"), Version 20.0.0 of Part II, Statement of Rates, Section 3 "Fuel and L&U Rates" of the Third Revised Volume No. 1A Tariff of its FERC Gas Tariff ("Tariff").

This tariff record revises the Fuel and Lost and Unaccounted-For ("L&U") retention percentages applicable to transportation service on EPNG's system and is proposed to become effective on January 1, 2025.

Background

Section 13 of the General Terms and Conditions ("GT&C") of the Tariff provides that EPNG will annually restate its Fuel and L&U percentages to be effective January 1st of each year. Pursuant to the Tariff and Subpart C of Part 154 of the Commission's Regulations,¹ EPNG is hereby filing to revise its Fuel and L&U retention percentages to become effective January 1, 2025. The filing uses a twelve-month data collection period ending September 30, 2024 and includes true-up computations as specified by the Tariff.

Description of Filing

The development of the Fuel and L&U retention percentages involves two computations in accordance with EPNG's Tariff provisions. First, the current period Fuel

¹ 18 C.F.R. §§ 154.201 -154.210 (2024).

and L&U retention percentages² are calculated based on Fuel consumption and L&U experienced during the twelve-month data collection period ending September 30, 2024.

Second, a volumetric true-up is computed by comparing the Fuel and L&U reimbursement during the same data collection period against actual Fuel use and L&U experienced. EPNG computes and collects L&U through a system-wide L&U retention percentage, while the Fuel charges are separated into defined categories such as Mainline Fuel, Production Area Fuel³ (further defined as Anadarko Basin Fuel, Permian Basin Fuel, and San Juan Basin Fuel), Permian Basin-Anadarko Basin Fuel, Willcox Lateral Incremental Fuel, and Interruptible Storage Service (“ISS”) Fuel.

Lost and Unaccounted-for Gas

The total overall system-wide L&U retention percentage will decrease to 0.02%.⁴ The current period collection percentage will decrease to 0.10% and the volumetric true-up decreases from negative 0.01% to negative 0.08%.

Mainline Fuel

EPNG proposes a Total Mainline Fuel Retention percentage of 1.90%, which is a decrease of 0.29% from the existing Total Mainline Fuel Retention percentage of 2.19%.⁵ The Total Mainline Fuel Retention percentage is composed of a current period retention percentage of 2.05% and a prior period true-up retention percentage of negative 0.15%. This represents a decrease in the current period retention percentage from 2.20% to 2.05% and a decrease in the prior period true-up retention percentage from negative 0.01% to negative 0.15%. The current period decrease is primarily due to increased system throughput relative to the quantity of fuel consumed during the data collection period. The decrease in the true-up percentage is due to an increase in the over-collected fuel volumes in the previous periods and relative to the increased system throughput.

Production Area Fuel

Anadarko Basin Fuel

The Total Fuel Retention percentage for the Anadarko Basin is proposed to be 0.42%, which is composed of a current period Fuel retention percentage of 0.36% and a prior period true-up retention percentage of 0.06%.⁶ This is an increase of 0.34% as compared to the existing Total Fuel Retention percentage of 0.08%. This increase is

² The term “current period” percentage refers to the “collection period.” The term “prior period true-up” percentage refers to “volumetric true-up” percentage.

³ The term “Within Basin” in the attached schedule is synonymous with the term “Production Area.”

⁴ See Appendix A, Schedule 1, Line 9.

⁵ See Appendix A, Schedule 1, Line 1.

⁶ See Appendix A, Schedule 1, Line 3.

primarily due to the return of over-collected fuel volumes in the previous period resulting in a true-up reimbursement percentage of 0.06% compared to negative 0.18%.

Permian Basin Fuel

The Total Fuel Retention percentage for the Permian Basin is proposed to be 0.45%, which is an increase from the existing Total Fuel Retention percentage of 0.25%. This is composed of a current period fuel retention percentage of 0.36%, and a prior period true-up retention percentage of 0.09%.⁷ This increase is primarily due to the changes in the monthly system index prices as shown on Appendix B, Schedule 8, Column (c) and the resulting conversion of electric costs to a dekatherm equivalent shown in Column (d).

San Juan Basin Fuel

The Total Fuel Retention percentage for the San Juan Basin is proposed to be 0.53% which is composed of a current period fuel retention percentage of 0.53%, and a prior period true-up retention percentage of 0.00%.⁸ This is an increase of 0.13% from the existing total fuel retention percentage of 0.40%. This increase is primarily due to the return of over-collected fuel volumes in the previous period resulting in a true-up reimbursement percentage of 0.00% compared to negative 0.10%.

Permian-Anadarko Area Fuel

The Total Fuel Retention percentage for the Permian-Anadarko Area Fuel zone is proposed to be 0.50% which is composed of a current period fuel retention percentage of 0.37%, and a prior period true-up retention percentage of 0.13%.⁹ This is an overall increase of 0.27% compared to the existing Total Fuel Retention percentage of 0.23% and is largely due to increased fuel consumption relative to the increase in system throughput resulting in a current period reimbursement percentage of 0.37% compared to 0.23%.

Willcox Lateral Incremental Fuel

Based on the throughput and fuel burned during the data collection period, EPNG proposes a Total Fuel Retention percentage for the Willcox Lateral of 1.14%, which is composed of a current period fuel retention percentage of 1.31% and a prior period true-up retention percentage of negative 0.17%.¹⁰ Overall, this decrease of 0.77% from the existing Total Fuel Retention percentage of 1.91% is primarily due to an increase in over-

⁷ See Appendix A, Schedule 1, Line 4.

⁸ See Appendix A, Schedule 1, Line 5.

⁹ See Appendix A, Schedule 1, Line 6.

¹⁰ See Appendix A, Schedule 1, Line 8.

collected fuel volumes in the previous period resulting in a true-up reimbursement percentage of negative 0.17% compared to 0.37% in the previous filing.

The workpapers included in Appendix A-E of this filing fully support and explain the proposed retention percentages for each fuel category and for the overall L&U.

Tariff Record

Section 3 “Fuel and L&U” of Part II Statement of Rates is tendered to revise the Fuel and Lost and Unaccounted Retention Percentages, as follows:

Retention Category	Currently Effective Total Percentage (Inclusive of True-ups)	Collection Period Percentage	Volumetric True-up Percentage	Proposed Total Retention Percentage
Mainline Fuel	2.19%	2.05%	-0.15%	1.90%
Anadarko Within Basin	0.08%	0.36%	0.06%	0.42%
Permian Within Basin	0.25%	0.36%	0.09%	0.45%
San Juan Within Basin	0.40%	0.53%	0.00%	0.53%
Permian-Anadarko Area	0.23%	0.37%	0.13%	0.50%
Interruptible Storage Service	1.52%	1.75%	-0.01%	1.74%
Willcox Lateral Incremental	1.91%	1.31%	-0.17%	1.14%
Lost and Unaccounted—for gas	0.17%	0.10%	-0.08%	0.02%

Operational Purchases and Sales Report

As required by GT&C Section 13.3(b) of the Tariff, EPNG is including, as Appendix F, Schedules 1 through 7 of its Operational Purchases and Sales report for the time period of October 2023 through September 2024.

Section 154.204 Discussion

Pursuant to 18 C.F.R. § 154.204 (2024), EPNG states the following:

- (a) EPNG does not anticipate a significant increase in revenues or costs as a result of the proposed tariff changes; and
- (b) EPNG is not aware of any other filings pending before the Commission that may significantly affect this filing.

Procedural Matters

In accordance with the applicable provisions of Part 154 of the Commission's regulations,¹¹ EPNG is submitting an eTariff filing XML package, which includes the following:

- 1) a transmittal letter;
- 2) clean and marked versions of the tariff record in PDF format;
- 3) workpapers under Appendices A-E in PDF format, and;
- 4) Operational Purchases and Sales Report pursuant to Section 13.3(b) of the GT&C under Appendix F.

EPNG respectfully requests the Commission accept the tendered tariff record for filing and permit it to become effective on January 1, 2025, which is not less than 30 days nor more than 60 days from the date of this filing. With respect to any tariff provisions the Commission allows to go into effect without change, EPNG hereby moves to place the tendered tariff provisions into effect at the end of any minimal suspension period specified by the Commission.

Correspondence and communications concerning this filing should be directed to:

Notes:

- 1/ See Appendix B, Schedule 3, Page 1, Line 29 for the within basin and the Permian-Anadarko fuel allocations and Line 42 for the total mainline fuel.
- 2/ Includes electric cost dekatherm equivalent as shown on Appendix B, Schedule 8, Column (d) and Permian Basin Fuel as shown on Appendix B, Schedule 3, Column (c), Lines 17-28.
- 3/ See Appendix B, Schedule 6, Line 152 for Willcox Lateral Incremental Fuel.
- 4/ Includes FL&U amounts retained from shippers using EPNG's capacity on the Mojave system. The retention rates during the collection period were:

Collection Period	Mainline System	Anadarko Basin	Permian Basin	Permian-Anadarko	San Juan Basin	Willcox Lateral Incremental
Oct 23 - Dec 23	2.23%	0.43%	0.28%	0.26%	0.62%	1.20%
Jan 24 - Current	2.20%	0.26%	0.26%	0.23%	0.50%	1.54%
Volumetric True-up						
Oct 23 - Dec 23	0.14%	0.12%	0.08%	0.05%	0.01%	0.03%
Jan 24 - Current	-0.01%	-0.18%	-0.01%	0.00%	-0.10%	0.37%

Mainline Fuel Allocation

Month	Total Gas Used [col (g), lines 1-12]	Area Gas Used After Allocation [col (g), lines 17-28]		Total Mainline Fuel [(b) - (c)]
30	October-23	2,868,276	202,871	2,665,405
31	November-23	3,044,327	217,210	2,827,117
32	December-23	3,046,296	221,239	2,825,057
33	January-24	2,675,351	205,259	2,470,092
34	February-24	2,509,315	203,511	2,305,804
35	March-24	2,249,732	220,491	2,029,241
36	April-24	2,063,550	181,750	1,881,800
37	May-24	1,874,869	163,358	1,711,511
38	June-24	2,086,065	168,784	1,917,281
39	July-24	2,724,385	178,188	2,546,197
40	August-24	2,808,138	200,438	2,607,700
41	September-24	2,818,163	219,374	2,598,789
42	Total Mainline Fuel	30,768,467	2,382,473	28,385,994

Notes:

- 1/ See Appendix B, Schedule 6 for total compressor and other fuel gas consumed.
- 2/ See Appendix B, Schedule 4, Page 1, Line 9 for the basin fuel; See Appendix B, Schedule 5, Page 1, Line
- 3/ See Appendix B, Schedule 4, Page 1, Line 1 for the basin fuel total; See Appendix B, Schedule 5, Page 1, Line 3 for the Permian-Anadarko fuel total.
- 4/ Since a portion of the fuel consumed within a particular basin is attributable to the basin's receipts that are transported on the mainline, a portion of the basin fuel is allocated to the mainline, based on a ratio of throughput contained within a basin to total receipts from the same basin. A similar allocation is performed for the Permian-Anadarko fuel. The indicated percentages calculated on line 16 are multiplied by the area fuel detailed in lines 1 through 12. The result is shown on lines 17 through 28.

El Paso Natural Gas Company, L.L.C.
Within Basin Allocation Workpaper

Line No.	Description	Anadarko Basin (a)	Permian Basin 2/ (b)	San Juan Basin (d)

Notes:

- 1/ On April 7, 2020, EPNG placed in service an electric motor drive to replace the GE turbine drive at its Waha Compressor Station located in Reeves County, Texas in the Permian Basin. See "Notice of Request Under Blanket Authorization", Docket No. CP19-489-000 (July 26, 2019). No fuel gas for the GE turbine drive at the Waha Compressor has been included in this filing. See Appendix B, Schedule 6, Line 106.
- 2/ Section 13.6(f) of the General Terms and Conditions of EPNG's Tariff requires the inclusion of the fuel quantity attributable to electric compression facilities. That section requires the electric fuel costs to be converted to a gas quantity equivalent by dividing the electric expenses by the "Monthly System Cash-out Index Price for the Appropriate Month". The calculated quantity of gas is to be included in the category where the electric expenses occurred.
- 3/ See Appendix F, Schedule 5, Column (g).

13	Total L&U Retention Percentage [line 11 + line 12]	0.02%

Notes:

- 1/ See Appendix C, Schedule 2, Page 1, Column (b), Line 13.
- 2/ See Appendix C, Schedule 2, Page 1, Column (b), Line 26.
- 3/ See EPNG's "Annual Recomputation of Fuel and Lost and Unaccounted-for Retention Percentages, Including the Operational Purchases and Sales Report," Appendix C, Schedule 1, Line 9, Docket No. RP24-193-000 (Nov. 30, 2023). An over-collection of 313,238 Dth was sought for true-up. Since only 9 months of the 12-month true-up period has passed as of September 2024, 9/12ths of this over-collection is included here.
- 4/ See EPNG's "Annual Recomputation of Fuel and Lost and Unaccounted-for Retention Percentages, Including the Operational Purchases and Sales Report," Appendix C, Schedule 1, Line 9, Docket No. RP23-202-000 (Nov. 22, 2022). An under-collection balance of 124,337 Dth was sought for true-up during the period of January 2023 through December 2023 and EPNG reflected 93,253 Dth of that amount in EPNG's "Annual Recomputation of Fuel and Lost and Unaccounted-for Retention Percentages, Including the Operational Purchases and Sales Report," Docket No. RP24-193-000 (Nov. 30, 2023). This filing reflects the remaining L&U True-Up deficiency quantities.
- 5/ See Appendix C, Schedule 2, Column (b), Line 39.
- 6/ See Appendix D, Schedule 1, Page 1, Column (e), Line 6.

Interruptible Storage Service Reimbursement Percentage Calculation

El Paso Natural Gas Company, L.L.C.
Interruptible Storage Service Fuel Retention Percentage Calculation 1/

Line No.	Description	Quantity (Dth)
	(a)	(b)
1	Washington Ranch Storage Fuel	
2	FERC Account 810 Usage	238,024
3	<u>FERC Account 812 Usage</u>	47,588
4	Total Fuel and Other Gas Use	285,612
5	Storage Injections	
6	October-23	2,069,207
7	November-23	1,479,945
8	December-23	852,604
9	January-24	281,881
10	February-24	1,087,642
11	March-24	1,953,617
12	April-24	2,483,294
13	May-24	1,681,201
14	June-24	1,010,876
15	July-24	1,324,442
16	August-24	1,083,885
17	September-24	758,060
18	Total Injections	16,066,654
19	Interruptible Storage (Over) or Under Collection - True Up 2/	(1,174)
20	Collection Period Interruptible Storage Retention Percentage	1.75%
21	Interruptible Storage (Over) or Under Collection - True Up	-0.01%
22	Proposed Interruptible Storage Service Retention Percentage	1.74%

Notes:

- 1/ In the current data collection period, there were no Rate Schedule ISS transactions. Therefore, EPNG proposes to continue to use the relationship of total fuel burned at the Washington Ranch storage field to the actual injected quantities to estimate a fuel retention percentage attributable to ISS service.
- 2/ See EPNG's "Annual Recomputation of Fuel and Lost and Unaccounted-for Retention Percentages, Including the Operational Purchases and Sales Report," Appendix E, Schedule 1, Column (b), Line 19, Docket No. RP16-229-000 (Nov. 24, 2015). 1,174 Dth were sought to be trued-up. Since there was no ISS activity during 12-month data collection period, this quantity remains to be refunded.

STATEMENT OF RATES FOR TRANSPORTATION OF NATURAL GAS

FUEL CHARGES 1/

Fuel and L&U	Collection Period	Volumetric True-up	Total Retention
Mainline Fuel:	2.05%	-0.15%	1.90%
Production Area Fuel:			
Anadarko Basin:	0.36%	0.06%	0.42%
Permian Basin:	0.36%	0.09%	0.45%
San Juan Basin:	0.53%	0.00%	0.53%
Permian - Anadarko Fuel:	0.37%	0.13%	0.50%
Rate Schedule ISS Fuel:	1.75%	-0.01%	1.74%
Willcox Lateral Incremental Fuel: 2/	1.31%	-0.17%	1.14%
L&U: 3/	0.10%	-0.08%	0.02%

- 1/ The Fuel charges are applicable to the quantity received. The Fuel charge may be discounted by Transporter; provided, however, that the discounted fuel shall not be less than actual fuel incurred. See Section 13 of the GT&C for further information.
- 2/ New firm service in effect after the in service date of the Willcox Lateral Expansion facilities shall be assessed the Willcox Lateral Incremental Fuel percentage.

- 3/ Transporter shall assess L&U charges only once. As long as Transporter is the sole supplier of quantities to the Willcox Lateral, L&U charges will be assessed on a Shipper's mainline TSA. If, in the future, a third party physically interconnects with the Willcox Lateral, Transporter will assess a Commission-approved L&U charge on the quantities supplied by the third party.
