

Kinder Morgan Keystone Gas Storage

Kinder Morgan Keystone Gas Storage LLC (KGS) wholly owned by Kinder Morgan Energy Partners, L.P. (KMP) is a high deliverability; multi-turn bedded salt cavern natural gas storage facility located in the Permian Basin and near the WAHA natural gas trading hub in West Texas. The KGS facility has seven bedded salt caverns, contains approximately 8.5 Bcf of total gas storage capacity and has a working natural gas storage capacity of approximately 6.38 Bcf. The KGS storage facility is connected to three large interstate natural gas pipelines - El Paso Natural Gas, LLC (El Paso), Transwestern Pipeline Company, LLC (Transwestern), and Northern Natural Gas Company (NNG).

Services Provided:

Keystone offers Firm, Interruptible storage services, including long-term storage, parks, and loans, wheeling services, and balancing agreements with its existing pipeline connections.
