

General Description of the System:

Kinder Morgan Gas Natural de Mexico's 85-mile Mier-Monterrey Pipeline stretches from the International Border between the United States and Mexico in Starr County, Texas, to Monterrey, Mexico. The pipeline currently has a capacity to transport 640,000 MMBtu per day and is currently being evaluated for further expansion. The pipeline connects to electric generation assets in the Monterrey area and to the CENAGAS natural gas transportation system in Monterrey.
