

General Description of the System:

Kinder Morgan Gas Natural de Mexico's 86-mile (approx. 139 kilometers) Mier-Monterrey Pipeline stretches from the International Border between the United States and Mexico in Starr County, Texas, to Monterrey, Nuevo Leon, Mexico. The pipeline currently has a capacity to transport 675,000 MMBtu per day. The pipeline connects to electric generation assets in the Monterrey area and to the CENAGAS natural gas transportation system in Monterrey.
