### Job Titles and Descriptions

JOB TITLE	JOB DESCRIPTION
ACCOUNT DIRECTOR	Implements complex strategies and initiatives relative to the sale of pipeline and storage capacity, and connection of new markets and supplies in relation to the competition, sale of facilities, and other negotiations. Responsible for the development and maintenance of customer relationships, contract renewals, open seasons, and customer information. Establishes an effective working relationship with other departments and provides advice to senior management with respect to pipeline operations and marketing opportunities.
ACCOUNT MANAGER SR II, MARKETING	Manage and develop commercial relationships with both present and potential customers. Negotiation of commercial transactions and provides day to day customer service to customers. Recognized as expert within the group. Usually has six to nine or more years of experience.
ANALYST-ACCOUNT SERVICES SR I	Responsible for performing a variety of customer related activities including: 1) preparation and evaluation of monthly invoices in compliance with Tariffs and SOX controls, 2) training customers about details on services offered, information and reports available, and 3) responding to and resolving customer inquiries and issues. Takes lead role in implementing and monitoring current invoicing policies, advises management, and champions changes to services and systems as needed. Supports marketing and business development teams selling transportation related services.
ANALYST-COMMERCIAL SR II, MARKETING	Responsible for supporting the Commercial Group with regard to invoicing, revenue trends, other commercial activities, and new business opportunities. Recognized as an expert within the group for complex business rules. Usually has six to nine or more years of experience.
ANALYST-OPS SR I	Analyzes actual area operational results versus budgets to determine reasons for variances. Maintains reports, budgets, and files. Researches and recommends improvements to coordinate the effective use of money, materials, and equipment.
ANALYST-OPS SR II	Responsible for ensuring compliance with, training and evaluation for, and documentation of all applicable regulations related to Gas Control and System Design. Responsible for planning and communication of maintenance and the associated impact to capacity.
CONTROLLER	Intermediate level position that operates pipeline facilities from the control center. Remotely monitors gas flows and pressures via SCADA to ensure safe and efficient operation of pipelines. Communicates effectively with field operations and customers. Responds to abnormal conditions and coordinates emergency communications. Has authority and accountability for remote operational functions to the pipeline facility.
CONTROLLER ASC	Entry level position that operates pipeline facilities from the control center. Remotely monitors gas flows and pressures via SCADA to ensure safe and efficient operation of pipelines. Communicates effectively with field operations and customers. Responds to abnormal conditions and coordinates emergency communications. Has authority and accountability for remote operational functions to the pipeline facility.
CONTROLLER LEAD	Leads and directs the work of other Controllers as a subject matter expert. Has shift dispatching responsibility in the control center. Participates in planning, scheduling, and implementing facility operations, shutdowns, and start-ups. Makes decisions in response to abnormal conditions and emergencies. Has authority and accountability for remote operational functions to the pipeline facility.
CONTROLLER SR	Operates pipeline facilities from the control center using advanced knowledge of gas flow, compression, regulations, and SCADA. Communicates effectively with field operations and customers. Participates in planning, scheduling, and implementing facility operations, shutdowns, and start-ups. Responds to abnormal conditions and coordinates emergency communications. Has authority and accountability for remote operational functions to the pipeline facility.
DIRECTOR-ACCOUNT SVC	Responsible for leading a team to manage customer related activities to: (1) prepare and evaluate monthly invoices in compliance with tariff and sox controls; (2) training customer about service information and reports available; (3) resolving customer inquires and issues around invoices and allocations; (4) review of Account Receivables; (5) providing enhancements to the revenue system; and (6) managing all aspects of compliance.
CHIEF OPERATING OFFICER - GAS PL	Directs the continuous operation, maintenance, and improvement of the entire pipeline system. Responsible for the planning, administration, and control of capital, operating, and other budgets for the entire system. Provides overall direction to and management of the engineering function. Responsible for insuring the technical integrity of the transmission system. Establishes and assures the proper administration of engineering policies, procedures, standards, codes, and programs in a manner consistent with company, governmental, and professional requirements.
COMMERCIAL-CONTRACT ADMIN SR II	Contract processing of service requests. Recognized as an expert. Determines and administers contractual rights as defined by the Tariff. Works closely with the customer, Marketing, Legal and Regulatory to ensure FERC processes and reporting requirements are followed. Capacity Release assistance to customers and administer the program in accordance with the Tariff and NAESB deadlines. Quarterly FERC Index of Customers generation, review and update to website. Facilitates name changes and company mergers. Seven years experience in gas pipeline business.
MANAGER IC-ACCOUNT SERVICES	Responsible for supporting the Commercial Group with regard to revenue forecasting, invoicing, receivables, complex business rules and new business opportunities. Acts as advisor to top management in strategic planning and acts as advisor to management team.
MANAGER IC-CAPACITY PLANNING	Manages Kinder Morgan's storage capacity with emphasis on optimizing profitability and enhancing physical operations. Directs the development of studies, summaries and models depicting financial and operational impacts. Makes decisions regarding pipeline and storage capacity and presents information to management for decision-making.
COMMERCIAL-CONTRACT ADMIN ASC	Contract processing of service requests with general supervision. Determines and administers contractual rights as defined by the Tariff. Works closely with the customer, Marketing, Legal and Regulatory to ensure that FERC processes and reporting requirements are followed. Capacity Release assistance to customers. Assists with the quarterly Index of Customers filing. Ensures executed contracts and correspondence reaches final records retention. Entry level position.

JOB TITLE	JOB DESCRIPTION
MANAGER-ENGINEERING RESERVOIR	An experienced, proven professional manages reservoir engineers and geologists within the Gas Storage Engineering department. Able to modify technical guidelines. Makes independent decisions that are typically not subject to technical review. May serve as a project manager on assignments requiring a broad knowledge of reservoir engineering. Usually requires at least twelve years experience and a B.S. or M.S. in Engineering or Geology.
MANAGER-SCHEDULING	Job description is a general overview of responsibilities and may vary by pipeline. Responsible for the daily management of scheduling activities for all pipes in region. Fully knowledgeable on how to schedule all pipes within region. Ensures accuracy of daily scheduling for any capacity allocations, as well as daily volume allocations for the monthly invoice and accounting close. Helps develop and post to EBB maintenance projects, unexpected outages, daily pipeline conditions, and other various postings. Development of training plans for new employees. Monitor work load distribution to insure equal to job level. Prepares and reports in AM/PM meetings. Helps with developmental plans for employee progressions. Completes annual employee performance reviews for approval and meeting with individuals. Ensures that all SOX Controls are strictly followed and provides Sox Control evidence as requested. Ensures that department is meeting all compliance requirements as well as help maintain the accuracy of compliance procedures
REP-SCHEDULER I	Job description is a general overview of responsibilities and may vary by pipeline. Entry level employee with no or very limited experience as a natural gas scheduler or in the natural gas industry. Requires close supervision. Limited work load. Will perform all basic job functions of Rep Scheduler; assist shippers with nomination issues, confirmation of locations, clearing of cut queues and running system balance. Responsible for insuring accurate volume allocations of assigned locations and resolving any issues for the monthly invoice and accounting close. Responsible for making sure OBA statements are sent out and signed by operators for assigned locations monthly. Reactive. Aware of importance to SOX Controls and all compliance responsibilities.
REP-SCHEDULER II	Job description is a general overview of responsibilities and may vary by pipeline. Entry level employee with Limited industry and or natural gas scheduling experience. Requires supervision. Light to Medium workload. Responsible for assisting shippers with nomination issues, confirmation of locations, clearing of cut queues and running system balance. Responsible for insuring accurate volume allocations of assigned locations and resolving any issues for the monthly invoice and accounting close. Responsible for making sure OBA statements are sent out and signed by operators for assigned locations monthly as well as manage the imbalance. Responsible for related activity for on-call rotation, holiday coverage and back up for DSR. Reactive. Fully aware of SOX Controls and all compliance responsibilities.
REP-SCHEDULER III	Job description is a general overview of responsibilities and may vary by pipeline. Has industry and or natural gas scheduling experience. Requires limited supervision. Has a medium to standard workload. Responsible for assisting shippers with nomination issues, confirmation of locations, clearing of cut queues and running system balance. Responsible for insuring accurate volume allocations of assigned locations and resolving any issues for the monthly invoice and accounting close. Responsible for making sure OBA statements are sent out and signed by operators for assigned locations monthly. Responsible for related activity for on-call rotation, holiday coverage, and back up for DSR . Understands most of "concepts" associated with region pipelines including basic contract knowledge. Mostly reactive in nature. Fully aware of SOX Controls and all compliance responsibilities.
REP-SCHEDULER LEAD	Job description is a general overview of responsibilities and may vary by pipeline. Has multiple years of experience. Has an expert level of understanding of all pipes within region of responsibility for both confirmation and scheduling. Extremely proactive and provides work direction for others. Has primary training responsibility for others. Primary tester for system change. Responsible for making sure OBA statements are sent out and signed by operators for assigned locations monthly. Responsible for related activity for on-call rotation and holiday coverage. Able to step in if manager is not available and report numbers in AM/PM meetings, conduct customer meetings, assist with resolving customer issues. Fully aware of SOX Controls and all compliance responsibilities.
REP-SCHEDULER SR I	Job description is a general overview of responsibilities and may vary by pipeline. Has greater than 5 years of industry and or natural gas scheduling experience. Does not require supervision. Has a standard to heavy workload. Responsible for assisting shippers with nomination issues, confirmation of locations, clearing of cut queues and running system balance. Responsible for insuring accurate volume allocations of assigned locations and resolving any issues for the monthly invoice and accounting close. Responsible for making sure OBA statements are sent out and signed by operators for assigned locations monthly as well as manage the imbalance. Responsible for related activity for on-call rotation as well as holiday coverage. Assist with training of new employees. Helps with presentations for customer meetings. Strong understanding of how pipes are scheduled. Fully understands how pipelines are scheduled. Flexible in ability to cover all shippers and locations. Fully aware of SOX Controls and all compliance responsibilities.
REP-SCHEDULER SR II	Job description is a general overview of responsibilities and may vary by pipeline. Has greater than 5 years of industry and or natural gas scheduling experience.
