NOTES:

- MEP transportation charges are calculated based on scheduled receipt quantity (Dth), whether it is a forward haul or a backhaul. Transportation to a pool is charged based on the pool zone. Transportation from a pool to points within the same zone is not subject to transportation charges. Transportation from a pool to another pool or delivery point in a different zone is charged based on the zone of the delivery.
- ACA and Net Cashout Balance (NCB) surcharges are billed for each Dth received per day on a FTS or ITS agreement. ACA is revised annually to be effective October 1. NCB is revised annually to be effective April 1.
- MEP transportation fuel is filed semi-annually to be effective **June 1** and **December 1**. Fuel is retained on transportation based on both the zone of receipt and on the zone of delivery. DART has a fuel calculator to determine the applicable fuel. To calculate fuel manually, for transportation across Zone 1 and Zone 2, the fuel rate is the sum of Zone 1 fuel gas plus Zone 2 fuel gas and System Haul Unaccounted for Gas. Fuel reimbursement applies on transportation to a Pool only. Transport away from a Pool to points within the same zone is not subject to fuel reimbursement. Transport to other zone, then fuel reimbursement for other zone only.
- PIN 44598 Enable Delhi interconnect is deemed a zone 1 delivery and/or a zone 2 receipt for rates and fuel calculations.
