

The General Terms and Conditions (GT&C), Section 30 (Specified Delivery Points) of Colorado Interstate Gas Company, L.L.C.'s (CIG) Second Revised Volume No. 1 FERC Gas Tariff (Tariff) identifies various delivery point types, including hourly and special requirements delivery locations.

Consistent with GT&C Section 30.1 of CIG's Tariff:

Unless otherwise agreed in a nondiscriminatory manner, Primary Points of Delivery for Transportation Service under Rate Schedules NNT-1, NNT-2, and the Hourly Rates of Flow option (pursuant to Rate Schedule FS-1) are restricted to the physical Points of Delivery listed below. Additionally, the Hourly Entitlement Enhancement Nomination (HEEN) (see General Terms and Conditions Section 1.37 of CIG's Tariff) option is available to serve variable hourly requirements at these Points of Delivery.

The current specified delivery points per Section 30.1 are:

LOCATION NAME	PIN
(BRS) Brush Station	800109
(CAN) Canon City	800128
(CHE) Cheyenne	800141
(CIT) Colorado Irrigation Taps	291035
(COS) City of Colorado Springs	800160
(CRK) Castle Rock Area	800169
(EDE) East Denver	800220
(FSC) First Creek	800255
(FTL) Fort Lupton	800261
(FTM) City of Ft Morgan	800262
(GRE) Greeley	800279
(HUG) Hugo	800320
(KST) Keyes Station	891036
(LAR) City of Laramie	891045
(LDH) Lakin, Deerfield and Holcomb	800378
(MCD) McClave Delivery	800414
(NDT) North Deertrail	800489
(PUE) Pueblo Stations	800599
(RTN) Raton	891100
(SPR) Springfield	891072
(TRI) Trinidad	800727
(WRK) White Rock	800793
(WSB) Walsenburg	891104
(WYT) Wyoming Hiline Tap	800819

Consistent with GT&C Section 30.2 of CIG's Tariff:

Unless otherwise agreed in a nondiscriminatory manner, Points of Delivery where HEENs are available also include those Points of Delivery listed as Section 30.2 locations. Such points may only be designated for secondary service under Rate Schedule NNT-1. Pursuant to Section 2.3 of Rate Schedule NNT-1, Short Notice Diversions may be made to those Points of Delivery on Transporter's EBB except as noted. The Points of Delivery included in this group are identified as being positioned in one of four operational areas, or in the system at large, to more effectively describe the operational capabilities available to the Short Notice Diversion service. Points of Delivery noted by an asterisk (*) are served by Transporter's high-pressure system. As such, they do not have direct access to NNT services and, therefore, are not eligible for Short Notice Diversions. Further, locations shown in the operational area designated as "Other" lie outside the traditional NNT delivery point service area and, therefore, they are not eligible for Short Notice Diversions.

The current specified delivery points per Section 30.2 are:

LOCATION NAME	PIN
<u>Front Range North:</u>	
(DNP) Dyno Nobel Plant	892174
(GBP) Greeley Bottling Plant	892187
(MLT) Milton	892306
<u>Valley Line South:</u>	
(CFI) Colorado Fuel and Iron	891003
(IDE) Ideal Cement	891034
(SHH)* Spruce Hill High	800680
<u>North Raton Lateral:</u>	
(BWF)** Black Wolf	892315
<u>Eastern Colorado:</u>	
(LPP) Limon Power Plant	800386
<u>Northeastern Colorado:</u>	
(BGC) Badger Creek	891966
(WES) Western Sugar	800770
<u>Other:</u>	
(FTH) Foothills	892328
(IBP) Iowa Beef Processors	891068
(MDA) Mid-America Station	891038
(MRD) McKee Refinery	892329
(PTR) Point of Rocks	800864
(RAW) Rawlins Sinclair	891126
(WLD) Walden	891874

Note that Points of Delivery noted by a double asterisk (**) are served by Transporter's North Raton Lateral (high-pressure system) and are eligible for HEEN service subject to a minimum of 50% of the scheduled flowing gas to the delivery point having a flow direction from south-to-north on the North Raton Lateral. If these criteria are not met, HEEN cannot be supported at these locations. Further, North Raton Lateral Points of Delivery do not have direct access to NNT services and, therefore, are also not eligible for Short Notice Diversions.

Consistent with GT&C Section 30.3 of CIG's Tariff:

Unless otherwise agreed in a nondiscriminatory manner, Points of Delivery where Rate Schedule NNT-1 Shippers may utilize their NNT Agreement for daily balancing (pursuant to Section 2.5 of Rate Schedule NNT-1) are listed below. However, because of the location of these facilities or because of high pressure delivery requirements, HEEN, Hourly Delivery Transfers (see Section 2.9 of Rate Schedule NNT-1) and Short Notice Diversions are not available at these Points of Delivery.

LOCATION NAME	PIN
(CRG) Corral Gulch Receipt	800167
(LTH) Little Horse Receipt	800394
(PON) Ponderosa	896046
(RIF) Rifle	892291

Consistent with GT&C Section 30.4 of CIG's Tariff:

Unless otherwise agreed in a nondiscriminatory manner, Points of Delivery where Rate Schedule NNT-1 Shippers may utilize their NNT Agreement for secondary deliveries, subject to available contract entitlements (i.e., when point entitlement quantities are not being used for primary point deliveries) are listed below. Except as noted below, daily balancing (pursuant to Section 2.5 of Rate Schedule NNT-1), HEEN and Hourly Delivery Transfers are also available at these Points of Delivery. Additionally, Short Notice Diversion (Section 2.3 of Rate Schedule NNT-1) is available at these locations. As shown in Section 30.2 above, the Points of Delivery included in this group are identified as being positioned in one of four operational areas, or in the system at large, to more effectively describe the operational capabilities available to the Short Notice Diversion service. Points of Delivery noted by an asterisk are served by Transporter's high pressure system. As such, these points are not eligible for Short Notice Diversions.

(a) To the extent an NNT-1 Shipper has scheduled HEEN on a high pressure system Transportation Service Agreement to a high pressure Point of Delivery identified in this Section, NNT hourly and balancing services on the high pressure system are available, subject to the provisions of the Shipper's NNT Agreement. CIG notes that consistent with Rate Schedule TF-1, Section 2.3(b), deliveries at a high pressure Point of Delivery will not exceed in any Hour 1/24th of the Scheduled Quantities resulting from HEEN.

LOCATION NAME	PIN
<u>Front Range North:</u>	
(ASH)* Aristocrat High	800066
(AST) Aristocrat Delivery	800067
(BPP) Brighton Power Plant	292073
(CCR)* Coyote Creek Meter Station	801485
(FLH)* Fort Lupton High	800239
(HSN) Hudson Low	800313
(HUD)* Hudson (High)	800319
(SKL) Skyline	891807
(STV)* St. Vrain	892191
<u>Valley Line South:</u>	
(MPH)* Midway PSCo High	800433
(MWP) Midway Public Service	800450
(NCS)* Nixon/Clear Spring	800488
<u>Eastern Colorado:</u>	
(BLU) Blue Spruce Power Plant	892088
<u>Northeastern Colorado:</u>	
(BCL) Beaver Creek Lateral	892149

Consistent with GT&C Section 30.5 of CIG's Tariff:

Unless otherwise agreed in a nondiscriminatory manner, Points of Receipt and Points of Delivery for Transportation Service under Rate Schedules TF-HP and TSB-Y are shown below and listed as High Plains Locations.

LOCATION NAME	PIN
(BAN) Banner Lake	896087
(BCS) Bijou Creek (Young Storage)	800077
(CZH) Crazy Horse	892247
(DER) Derby Lake	896091
(FLY) Flying Hawk	800245

(PCK)	Porcupine Creek	896094
(RMP)	Red Maple	896095
(TTN)	Tri-Town	800730

Consistent with GT&C Section 30.6 of CIG's Tariff:

Unless otherwise agreed in a nondiscriminatory manner, Points of Receipt and Points of Delivery for Transportation Service under Rate Schedule TSB-T are shown below and listed as Totem Storage Locations.

	LOCATION NAME	PIN
(BAN)	Banner Lake	896087
(CZH)	Crazy Horse	892247
(DER)	Derby Lake	896091
(FLD)	Fulton Ditch Meter Station	801487
(FLY)	Flying Hawk	800245
(KCS)	Kiowa Creek (Totem Storage)	800338
(PCK)	Porcupine Creek	896094
(RMP)	Red Maple	896095
(TTN)	Tri-Town	800730

Should any of the information posted above be modified or if new information becomes available, CIG will post updated notices as promptly as possible.

For scheduling questions, please contact the Nominations and Scheduling hotline at 1-800-238-3764, option #2.
