

January 21, 2021

Ms. Kimberly D. Bose, Secretary Federal Energy Regulatory Commission 888 First Street, N.E. Washington, D.C. 20426

Re: Southern LNG Company, L.L.C.

Docket No. RP21-____

Dredging Surcharge Cost Adjustment

Dear Ms. Bose:

Southern LNG Company, L.L.C. ("SLNG") files the following revised sections to its FERC Gas Tariff:

Section 2.1, LNG-1 Firm Terminal Service, Version 27.00

Section 2.2, LNG-2 Interruptible Terminal Service, Version 27.00

Section 2.3, LNG-3 Firm Terminal Service, Version 28.00

The proposed sections increase the dredging surcharge to maintain the Elba Island turning basin and marine slip for LNG ships from \$0.0455 to \$0.0490 per dekatherm ("Dth") of storage capacity. Attachment A contains both clean and marked versions of these sections. SLNG requests that the Commission accept the revised sections to become effective March 1, 2021. Attachment B contains supporting workpapers.

Nature, Basis and Reasons

SLNG owns and operates the LNG import/export terminal on Elba Island, Georgia. The marine slip cut into Elba Island (which can accommodate two LNG ships at once) is the area for unloading and loading LNG ships. Dredging and disposal of sediment from the marine slip as well as the turning basin in the river adjacent to the marine slip is necessary to maintain safe depth for LNG ships.

On October 10, 2002, the Federal Energy Regulatory Commission ("Commission") approved an uncontested settlement in Docket No. RP02-129.¹ The settlement requires SLNG to track costs to maintain "the turning basin, channel and berths." The maintenance dredging performed under the tracker is designed to provide for safe berthing and navigation of LNG ships.

Southern LNG Inc., 101 FERC ¶ 61,009 (2002).

Id. at 61,038, para. 3 ("Article II of the S&A provides for the adoption of Original Sheet Nos. 105a and 105b, which institute a mechanism designed to track SLNG's maintenance costs associated with dredging, including spoil disposal costs involved in such dredging.").

Ms. Kimberly D. Bose January 21, 2021 Page 2

Maintenance activities include dredging silt and sand deposited by hydrodynamics of the river, surveying the depth of the water to ensure safe navigation, and building up the capacity of the containment areas on Elba Island, where SLNG disposes of dredge spoil. All three costs are included in this filing for the next annual period.

This filing increases the dredging surcharge for the maintenance costs by \$0.0035 to \$0.0490. Attachment A contains clean and marked tariff sheets effecting this change. This rate recovers the projected costs of \$7,017,820 plus a (\$103,663) balance in the deferred account for revenues collected in excess of expenses incurred. Schedules 1 through 4 of Attachment B provide additional support.

Tracker Mechanism

Article II of the approved settlement states that "SLNG shall place into effect the tracker of maintenance dredging costs set forth on Original Sheet Nos. 105a and 105b." These sheets 105a and 105b (which have been renumbered) pertain to Section 24.3 of SLNG's General Terms and Conditions ("GT&C"). Section 24.3 contains the following terms and conditions:

1. <u>Annual dredging period</u>.

SLNG must file with the Commission at least thirty days prior to the beginning date for each Maintenance Dredging Annual Period (GT&C § 24.3(b)(ii)). The next maintenance dredging annual period begins on March 1, 2021. SLNG therefore submits this filing on January 21, 2021.

2. <u>Total dredging cost.</u>

In each Annual Maintenance Dredging Cost Filing, SLNG shall adjust its dredging surcharge as follows: (a) SLNG must determine the Estimated Maintenance Dredging Costs for the next annual period; and (b) the Estimated Maintenance Dredging Costs must be decreased by any overcollection balance in the deferred account or increased by any undercollection balance in the deferred account (GT&C § 24.3(d)). Finally, the total cost must be divided by the reservation charge billing determinants.

a. Estimated Future Costs.

SLNG has determined the Estimated Maintenance Dredging Costs for the upcoming Maintenance Dredging Annual Period to be \$7,017,820. Schedule 4 estimates the annual expenses necessary to maintain the required depth and to dispose of spoil (GT&C § 24.3(a)(i)).

SLNG contracts for the dredging, surveying, and disposal services included in the tracker. Based on the trend of river siltation and contractor pricing, SLNG estimates \$3,847,000 for dredging in 2021. This compares to \$3,684,202 spent in 2020.

In addition to dredging costs, SLNG adds the \$190,000 cost of surveying the river depth several times each year to satisfy Coast Guard and river pilot requirements and to monitor the depth of dredging. The estimated annual cost also includes \$2,980,820 to build up the disposal areas on Elba Island and to help dry the dredged material within the disposal areas. This estimated

Ms. Kimberly D. Bose January 21, 2021 Page 3

amount compares to \$2,764,932 spent in 2020 on spoil disposal cost. SLNG continues to believe that disposal on Elba Island remains the lowest cost option, given the scarcity of alternatives and permitting obstacles for offsite disposal.

b. Past Year's Overcollection.

Schedule 3 shows the actual costs in 2020 for dredging, surveying, and disposal, which totaled \$6,620,728. This compares to \$6,731,820 estimated for 2020 as reflected on Schedule 4 in last year's filing (RP20-447). This difference is mainly attributable to the estimate including more dredging than actually incurred in 2020.

The overall difference between estimates and actuals, when combined with the overcollection negative deferred account balance from last year's filing, results in an overcollection negative balance in the Maintenance Dredging Deferred Account of \$103,663. Schedule 2 shows by month, plus interest, the amount in the deferred account. SLNG adds to the deferred account balance the Estimated Maintenance Dredging Costs described above in paragraph (a) (GT&C § 24.3(d)(ii)).

3. Tracker Rate per Dth.

SLNG divided the total Estimated Maintenance Dredging Costs by the Estimated Reservation Charge Billing Determinants (GT&C § 24.3(d)(iii)). The maximum storage capacity billing determinants for the next annual period equals 141,143,040 Dth, which is the same as in last year's filing (see footnote 5 in the attached Schedule 1 for support). SLNG has divided the total Estimated Maintenance Dredging Costs by the total Dth to derive the rate as shown in Schedule 1 and on the tariff sheets in Attachment A.

The tariff sheets add the surcharge to the reservation charge for firm service under Rate Schedules LNG-1 and LNG-3. The surcharge is also added to the monthly charge for interruptible service under Rate Schedule LNG-2. SLNG proposes to make the increase effective March 1, 2021, as provided in the tariff sheets, the settlement, and the Commission's order approving the settlement.

Procedural Matters

Pursuant to the applicable provisions of Section 154.7 of the Commission's regulations, SLNG submits the following materials in connection with the filing:

- 1. An etariff XML filing package containing the proposal in electronic format;
- 2. A transmittal letter;
- 3. Attachment A, containing clean and marked versions of the tariff sections in PDF format; and
- 4. Attachment B, containing supporting workpapers.

As required by Section 154.208 of the Commission's regulations, copies of this filing are being made available at SLNG's offices in Birmingham, Alabama and electronically mailed to SLNG's customers and interested state commissions.

The name, title, and mailing address of the person to whom communications concerning this filing is to be addressed and on whom service is to be made is as follows:
