

Today's Date

Power Plant Name

TGP Meter No.(s)

Powerplant size (Estimate)

Plant maximum burn rate (Dth/d) (Estimate)

Nominal Heatrate (Btu/kWh) (Estimate)

Note: 1 MMscf/d is approximately equal to 100,000 Dth/d, assuming the HHV of the gas is 1,000 BTU per cubic foot

**Estimated Anticipated daily volumes**
