

Company Overview

Kinder Morgan Energy Partners' Tennessee Gas Pipeline is a 13,900-mile pipeline that transports natural gas from supply areas in Louisiana, the Gulf of Mexico, South Texas and Appalachia to markets in the Northeast, Midwest, and Southeast areas of the United States as well as Canada and Mexico. With 90 BCF of storage capacity, access to several major supply areas, and the ability to serve multiple markets in the US and abroad, Tennessee Gas Pipeline is exceptionally well positioned to meet the demands of our customers both now and in the future.
