Federal Energy Regulatory Commission 888 First Street, N.E. Washington, D.C. 20426

Attention: Ms. Debbie-Anne Reese, Secretary

Re: Annual Fuel Reimbursement Percentage Update Filing:

Young Gas Storage Company, Ltd.;

Docket No. RP25-

Commissioners:

Young Gas Storage Company, Ltd. ("Young") tenders for filing and acceptance by the Federal Energy Regulatory Commission ("Commission") Part II: Statement of Rates, Section 2 – Fuel and L&U Rates, Version 12.0.0 for inclusion in its FERC Gas Tariff First Revised Volume No. 1 ("Tariff").

Pursuant to the procedures set forth in Section 13 of the General Terms and Conditions ("GT&C") of the Tariff, the tariff record is submitted to revise Young's Fuel Reimbursement Percentage.

Background

Section 13 of the GT&C states that the Fuel Reimbursement Percentage¹ shall be computed at least annually using the procedures described in that section. The previous Fuel Reimbursement Percentage filing was accepted and rates were effective January 1, 2024.² This instant filing seeks rates to be effective January 1, 2025.

Reason for Filing

Fuel Reimbursement Percentage Update

Young develops the Fuel Reimbursement Percentage by calculating and adding the current period fuel reimbursement and fuel true-up percentages. The current period fuel reimbursement percentage is derived from available system operations data for a twelve-month data collection period. For this filing, the data collection period is from

The Fuel Reimbursement Percentage is defined in Section 1.21 of the GT&C of the Tariff.

See Young Gas Storage Co., Docket No. RP24-173-000 (Dec. 13, 2023) (letter order accepting the currently effective Fuel Reimbursement Percentage).

October 1, 2023 through September 30, 2024.³ The quantity of fuel actually consumed in operations is divided by the quantity of gas actually received from shippers for injection into storage. Based on this calculation, the proposed current period fuel reimbursement percentage component will decrease from 3.74% to 3.71%.

For the derivation of the fuel true-up percentage component, the quantity of fuel actually retained is subtracted from the quantity of fuel actually used revealing an under-collection of 535 Dth.⁴ Also, a comparison of the true-up quantities sought in the past fuel filing to the true-up quantities retained indicated an under-collection of 7,095 Dth. The sum of these quantities results in a remaining under-collection of 7,630 Dth to be recovered from the shippers through a 0.19% fuel true-up percentage, as compared to the fuel true-up percentage in the previous filing of 0.50%.

The sum of the current period fuel reimbursement percentage of 3.71% and the fuel true-up percentage of 0.19% yields the proposed Fuel Reimbursement Percentage of 3.90%. As such, the Fuel Reimbursement Percentage is proposed to decrease from 4.24% to 3.90%. Detailed calculations supporting these proposed percentages are provided in Appendices A and B submitted herein.

Description of Filing

Young is submitting this filing, pursuant to Subpart C of Part 154 of the Commission's regulations⁶ and Section 13 – Fuel Reimbursement of the GT&C, to revise its Fuel Reimbursement Percentage.

<u>Part II: Statement of Rates</u> is submitted herewith to revise the Fuel Reimbursement Percentage calculated pursuant to Section 13 of the GT&C.

Section 154.204 Discussion

Pursuant to 18 C.F.R. § 154.204 (2024), Young states the following:

- (a) Young does not anticipate a significant increase in revenues or costs as a result of the proposed tariff changes; and
- (b) Young is not aware of any other filings pending before the Commission that may significantly affect this filing.

As specified in Section 13.3 of the GT&C, the data collection period is the most recent twelve months of information available ending two months before the filing date.

See GT&C Section 13.3 for additional information on the true-up adjustment mechanism.

See Young Gas Storage Co., Docket No. RP24-173-000 (Dec. 13, 2023) (letter order accepting the currently effective Fuel Reimbursement Percentage).

⁶ See 18 C.F.R. §§ 154.201 – 154.210 (2024) (Subpart C).

Procedural Matters

In accordance with the applicable provisions of Part 154 of the Commission's regulations,⁷ Young is submitting an eTariff filing XML package which includes the following:

- a. a transmittal letter;
- b. work papers under Appendices A B in PDF format; and
- c. the clean and marked versions of the tariff record in PDF format.

Young respectfully requests the Commission accept the tendered tariff record for filing and permit it to become effective on January 1, 2025, which is not less than 30 days or more than 60 days following the date of this filing. With respect to any tariff provisions the Commission allows to go into effect without change, Young hereby moves to place the tendered record into effect at the end of the minimal suspension period, if any, specified by the Commission.

Correspondence and communications concerning this filing should be directed to:

Notes:

^{2/} In Docket No. RP23-225-000, Young calculated an under-collection of 26,199 Dths for the fuel true-up quantity. See Annual Fuel Reimbursement Percentage Update Filing, Appendix A, Schedule 1, Column (b), Line 7, Docket No. RP23-225-000 (Nov. 30, 2022). Since only 4 months of the 12-month true-up period are included in this filling, Young is including 4/12ths of the true-up quantity to compare to the quantities trued-up during this time period.

^{2/} In Docket No. RP24-173-000, Young calculated an under-collection of 26,501 Dths for the fuel true-up quantity. See Annual Fuel Reimbursement Percentage Update Filing, Appendix A, Schedule 1, Column (b), Line 7, Docket No. RP24-173-000 (Nov. 28, 2023). Since only 8 months of the 12-month true-up period are included in this filing, Young is including 8/12ths of the true-up quantity to compare to the quantities trued-up during this time period.
