Register a mobile device, hardware authenticator, or FIDO Security Key so you can authenticate to access protected applications.		
	Choose an authenticator to register.	
Register an authenticator	SecurID SecurID	
	SecurID App SID700	

If the application is installed on the mobile device, click the *next* button and open the *SecurID* app on your mobile device.

If you have not installed the app, go to installation instructions.

	2 Install SecurID Register Authenticator Authenticator
	On your iOS, Android, or MacOS device, go to the <u>App Store</u> or <u>Google Play</u> . install.step.securid.gotostore.desktop
SecuriD	Search for the SecurID Authenticator
<u>+</u>	Install the App
	Cancel Next

Open the *SecurID* app on your mobile device.

Press the *Get Started* button to begin the credential import process.

#### Apple

Allow access to the Camera to scan the QR Code displayed in the SecurID Browser.

You can change this setting in your device settings after completing the registration process.

If you do not want to allow access to the camera, press *Don't Allow*. You will need to enter the information manually.

#### Android

Hold your mobile device up to the screen displaying the QR Code.

DO NOT SCAN THE QR CODE FROM THIS DOCUMENT!

Center the QR Code in the camera viewing window while slowly moving the device backwards until the QR Code is read.

When the credential information is imported successfully, a pop-up will be shown. Press *OK* to continue.

Leave the device and application open to test the authentication token process.

After the mobile device has successfully imported the credential information, the browser screen will change to the one displayed on the right.

Use the *Test Now* button to ensure the device registration was successful.

The browser window will update to show a screen like below.

Confirm the test by pressing the green check mark on your mobile device.

#### Sending Sign-In Request

Check **User's iPhone** for a notification to continue authentication.
